

BUILDING CONSERVATION MASTERCLASSES
MANAGING WILDLIFE IN THE HISTORIC ENVIRONMENT
BC3D215 9-12 MAY 2016 (3 day course)

This course is intended for architects, surveyors, contractors and site managers. The teaching is divided between illustrated lectures and local site visits to a hill fort, church and ruined priory and unique access to the West Dean bat tunnel accompanied by a licensed bat handler.

The course aims to give an understanding of the plants and animals which occur on and in historic buildings and sites and the implications of legislation in their management. These are not only important for wildlife conservation but they also contribute to the aesthetic appeal of sites and are a valuable educational resource. While some may be damaging to masonry or artefacts, others are benign and might actually give protection from erosion or decay.

The course will look at the flora and fauna of historic structures and their surroundings, the use of vegetation to protect ruined wall-tops ('soft capping') and the implications for site management with special reference to bats and their conservation requirements.

Please remember to bring a torch, waterproofs and strong footwear for use on the excursions.

Course Leader: Alan Cathersides,
National Landscape Advisor, Historic
England

Principal Tutor: Vince Giavarini,
Lichenologist

Tutors:

John Baker, Herpetologist; George Bemment, Bat Ecologist; Mike Edwards, Entomologist; Malcolm Emery, Senior Reserve Manager, Natural England; Chris Wood, Head of Building Conservation and Research Team, Historic England.

All students on this course will receive a copy of *English Heritage Practical Building Conservation: Conservation Basics*.

OUTLINE PROGRAMME

Day 1 Monday

14.00-14.30 Registration at College and check-in to room
15:00 Lecture. Introduction to course

17.30	Lecture. Wildlife, Health and Safety, Pesticide and other legislation and the implications for historic site management Check-in to room (alternative time)
Evening	Introduction to reptiles and amphibians
Day 2	Tuesday
Morning	Lecture. Trees on monuments Lecture. The flora of historic walls – bryophytes and lichens
Afternoon	Lecture. Climbing plants on walls Lecture. Bats in historic buildings
Evening	Excursion. Bat Walk on the West Dean Estate, including a visit to a hibernation site in a disused railway tunnel
Day 3	Wednesday
Morning	Lecture. The flora of historic walls – flowering plants and ferns Lecture. Grassland ecology and management
Afternoon	Excursion. To The Trundle – An Iron Age hill fort illustrating different grassland flora and management techniques and Boxgrove Priory – a partly ruined medieval priory and functioning parish church illustrating a wide range of micro-habitats for flora
Evening	Lecture. The insect fauna of historic walls
Day 4	Thursday
Morning	Lecture. Soft-capping: Using vegetation to protect wall tops Lecture. Dealing with problem species on monuments
Afternoon	Project. A group desk exercise, followed by feedback Final questions, event evaluation and close
16.00	Issue of certificates and depart.

Non-residential course fee £598

Fully inclusive residential course fee:

Shared bathroom facilities £754

Standard room with private bathroom facilities £814

Superior room with private bathroom facilities £874

This course qualifies for BASIS (British Agrochemicals Standards Inspection Scheme) CPD points

HOW TO BOOK

Please complete one booking form, or copy of form, per person per course and enclose a deposit for each course booked. On receipt of your booking, we will send all the further details you will need for your visit, including the course details and your final payment slip. Travel instructions will be sent to all students.

For further information about the course, please contact the Course Organiser: cpd@westdean.org.uk or +44 (0) 1243 818219.

For further information about booking, please telephone the Bookings Office: +44 (0)1243 818300.
