

## SHORT COURSE DETAILS

### SLW07840 DIGITAL STREET PHOTOGRAPHY

Tutor: ROY MATTHEWS

Dates: LONG WEEKEND FRIDAY 4 MAY – MONDAY 7 MAY

#### ABOUT YOUR COURSE:

Discover the secrets of capturing images of people in the urban environment. This practical workshop explores the techniques and ideas essential to producing stunning street images, including presentations in technique and in depth critiques.

A fun and challenging workshop designed to give you an insight into the skills behind successful photojournalism and help to improve your travel photography in general. Taking trips out to two different urban locations, the workshop will look in depth at how to best capture the moment, select a subject, control your background, use different lens for unique looks and much more. Images will then be reviewed and discussed back in the digital studio at the College, where the tutor will introduce post processing using Adobe Lightroom and Photoshop software and how to best enhance your images.

#### LEVEL: SUITABLE FOR ALL

A subject focused course that is delivered to suit any level of experience from beginner to advanced practitioner. A structured start is followed by guided independent practice.

Ideally some knowledge of camera settings would be an advantage.

**It is important to note that it is essential that you are familiar with using a computer, as while the tutor will give instruction on getting to grips with imaging software, basic computer skills will be assumed. Basic familiarity with Adobe Photoshop and Lightroom software (Creative Cloud version used on the course) would also be an advantage – the course will be taught using full Photoshop software.**

The course is for up to 8 participants. While each will be allocated a laptop, some of the other equipment provided in the studio is shared.

#### ABOUT YOUR TUTOR:

Roy Matthews has worked as a freelance photographer in many areas including advertising, travel, tourism and editorial for such clients as the BBC, BT, M&S and John Lewis. Roy now teaches workshops, passing on the skills learnt in the commercial world.

#### TIMETABLE:

**REQUIRED PREPARATION:**

Ensure your camera battery is fully charged and memory cards are cleared.

**MATERIALS FOR YOUR COURSE:**

We have a generously stocked craft shop, which opens daily from 8.30am–2pm. For any materials you need to purchase from the shop, we suggest you do so during the first morning of your course, after having discussed with your tutor.

**Available from the Shop:**

Memory sticks

**Please bring any of the above, if you have them, and in addition:**

A Digital SLR Camera\* (with manual setting) and all the lenses you have, especially normal focal length and wide angle are useful (with manual focus).

\*'Bridge' or Advanced compact cameras that have full manual control over exposure settings and the option to manually focus can also be used on this course

Any lens filters you have

Tripod – essential

Fully charged and spare camera batteries – and charger

Camera memory cards

USB lead for your camera

Cable release or remote (can also use camera self-timer, if you don't have these)

A USB memory stick to save your images

Be prepared to work out doors so bring appropriate clothing, plus waterproofs/sun protection and suitable footwear

**HEALTH AND SAFETY:**

The tutor instructs students in health and safety issues relevant to this course. Students may work unsupervised on agreed projects once they have satisfied the tutor as to their competence. There may be restrictions on the equipment available to students in the tutor's absence. All Personal Protection Equipment, apart from footwear, is provided by the College.
